PROFILE SUMMARY

Full Stack Developer with 4+ years of experience shipping 30+ production web applications, from early-stage MVPs to AI-driven SaaS platforms. Builds scalable end-to-end architectures with React, Next.js, Node.js, and Python (FastAPI) — covering everything from polished UIs to REST/GraphQL APIs and backend automation.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python

Frontend Technologies: React.js, Next.js

CSS Libraries: Tailwind CSS, ShadCN, Material UI, Chakra UI, Ant-Design, Bootstrap

Backend Technologies: Node.js, Express.js, FastAPI

ORM's: Mongoose, Prisma, TypeORM, Sequelize

Database Management: MongoDB, PostgreSQL, Neon Postgres, Supabase, MS SQL, Redis, RabbitMQ

DevOps and Cloud: Docker, AWS, Azure, CI/CD, Deployment

AI & Full-Stack Integration: LLMs (OpenAI, LangChain), RAG, Pinecone, Vector Databases

Testing & QA: Cross-Browser Testing, Debugging, Performance Optimization

Version Control: Git, GitHub, GitLab

Tools: Postman, VS Code, Cursor, Claude Code, Warp

PROFESSIONAL EXPERIENCE

Full Stack Developer

Converge Labs

Aug 2025 – Present

Remote — London, UK

- Built and maintained AI-driven platforms across 11+ projects using React, Node.js, and Python (FastAPI), spanning web apps, desktop apps, and SEO-optimized websites.
- Developed market-data processing services to generate automated trading signals and decision-making workflows.
- Implemented workflow automation systems for visa case management, improving case tracking and reducing manual operations.
- Created job scraping pipelines and integrated AI-based chat agents to automate vendor communication and internal workflows.

MERN Stack Developer

eSpark Consulting Group

Oct 2023 – July 2025

Remote — Karachi, Pakistan

- Contributed to 20+ projects, including AI-based SaaS products, delivering scalable and high-performance web applications across multiple domains.
- Worked on key products such as eSpark Talent, Vividly AI, Koing AI, and POS systems.
- Developed scalable frontend applications using ReactJS and NextJS with a focus on performance and maintainability.
- Implemented modular and reusable React components using Redux and Zustand for state management.
- Integrated REST and GraphQL APIs to enable dynamic, data-driven user interfaces.
- Identified and resolved critical issues through efficient debugging and performance optimization.

Frontend Engineer

Getweys

Oct 2022 – Sept 2023

Karachi, Pakistan

- Developed scalable web applications using ReactJS and NextJS.
- Developed modular, reusable React components with Redux and Zustand for efficient state management, and integrated React Query for optimized caching and data fetching.
- Integrated REST and GraphQL APIs to support dynamic, data-driven UI behavior.
- Conducted cross-browser compatibility testing to ensure consistent performance across modern browsers.

EDUCATION

Sindh Madressatul Islam University

Bachelor of Science in Computer Science

Jan 2019 – Jun 2023

Karachi, Pakistan

- Relevant Coursework: Database Management Systems, Object-Oriented Programming, Software Project Management, Operating Systems, Algorithms, Artificial Intelligence, Machine Learning

PROJECTS

DealIQ

- Engineered a sales automation platform unifying WhatsApp and listing-site leads into a single dealership pipeline.
- Automated deal tracking from first customer contact through to close, removing manual handoffs between sales reps.
- Built the backend with Python and FastAPI to power real-time conversation sync and automated follow-ups.
- **Technologies:** Next.js, React, Python, FastAPI, Automation

CosmWasm

- Architected the frontend of a smart contract platform for the Cosmos blockchain using Next.js and TypeScript.
- Designed secure, high-performance interfaces supporting cross-chain contract deployment and interaction.
- Collaborated with blockchain engineers to translate complex smart-contract workflows into an intuitive UI.
- **Technologies:** Next.js, Chakra UI, TypeScript

Revel

- Developed a coaching platform connecting students, parents, and schools around a shared view of academic progress.
- Designed dashboards translating one-on-one coaching sessions into clear, actionable guidance for families.
- Implemented a FastAPI backend to manage student profiles, sessions, and progress tracking at scale.
- **Technologies:** Next.js, React, Python, FastAPI, Tailwind CSS

Vividly AI

- Developed an all-in-one AI content suite combining human-like text generation, image creation, and voice calling.
- Integrated LLM-powered chatbots to generate natural, high-quality responses across multiple content formats.
- Consolidated tools creators previously juggled across separate platforms into a single cohesive product.
- **Technologies:** Next.js, React, Node.js, AI/LLM, Tailwind CSS

Saff

- Built a platform supporting a six-week founder residency for Muslim entrepreneurs, from application to demo day.
- Combined a go-to-market playbook, structured capital access, and a demo-day film pipeline into one experience.
- Crafted a polished, story-driven UI that reflects the program's brand across each cohort touchpoint.
- **Technologies:** Next.js, React, Tailwind CSS

Clerify

- Developed a case management platform taking immigration cases from client intake through USCIS e-filing.
- Replaced manual, paper-based workflows with structured digital case tracking for immigration lawyers.
- Organized the UI around case lifecycle stages to cut down time lawyers spent tracking status manually.
- **Technologies:** Next.js, React, Tailwind CSS

Horizon Bio

- Built a platform translating personalized epigenetic data into actionable metabolic health insights.
- Designed reporting views helping users understand and act on risk factors for conditions like diabetes.
- Prioritized clear data visualization to make complex biological findings approachable for non-experts.
- **Technologies:** Next.js, React, Tailwind CSS
